

US005363108A

United States Patent [19]

Fullerton

[11] Patent Number:

5,363,108

[45] Date of Patent:

Nov. 8, 1994

[54] TIME DOMAIN RADIO TRANSMISSION SYSTEM

[75] Inventor: Larry W. Fullerton, Huntsville, Ala.

[73] Assignee: Charles A. Phillips, Ardmore, Tenn.;

a part interest

[21] Appl. No.: 846,597

[22] Filed: Mar. 5, 1992

57] ABSTRACT

A time domain communications system wherein a broadband of time-spaced signals, essentially monocycle-like signals, are derived from applying stepped-inamplitude signals to a broadband antenna, in this case, a reverse bicone antenna. When received, the thus transmitted signals are multiplied by a D.C. replica of each transmitted signal, and thereafter, they are, successively, short time and long time integrated to achieve detection.
